

Cybersecurity Journey with

At **Kappa Data**, we understand that the cybersecurity landscape is dynamic and complex.

As a value-added distributor specializing in network, connectivity and cybersecurity solutions, we empower our IT partners to navigate this evolving space with confidence, helping you along the way during your Cybersecurity Journey.

Our approach focuses on the **CyberFundamentals framework** which covers 5 key cybersecurity pillars: Identify, Protect, Detect, Respond and Recover.

IDENTIFY

The first step in securing any environment, is gaining visibility. Getting the light on in the dark.

We offer products and services that can help you with:

- Identifying every asset within the network, from traditional devices to IoT endpoints
- Deploy state-of-the-art asset discovery tools to map the infrastructure comprehensively
- Conduct risk assessments to understand vulnerabilities and set a strong foundation to protect these assets

PROTECT

Protecting assets is essential to prevent breaches and data loss.

We offer different solutions and services to help you with this, such as:

- NextGen Firewalls
- Network Access Control
- EDR, XDR, MDR (Endpoint/Extended/Managed Detection and Response)
- Encryption
- Privileged Access Management
- Mobile Device Management
- Wireless Intrusion Prevention
- And so much more!

DETECT

Threats are constantly evolving, making detection a critical component. We enable you to utilize EDR, XDR and MDR solutions for real-time threat detection and visibility. These tools implement advanced monitoring to spot vulnerabilities, malware, ransomware...

RESPOND

Together with our vendors, we can help you to effectively minimize damage and accelerate recovery using incident response services. These MDR services provide rapid response to contain and mitigate attacks. Experts are ready 24/7 to handle incidents and make sure you and the customer can be confident that your valuable IT assets are protected against possible attacks. Even warranties are available if something should go wrong.

RECOVER

If something happened, there are many ways to recover from attacks. There is a 24/7 hotline available with a rapid response team to help you to recover. But ofcourse also various backup and disaster recovery solutions are available in our portfolio.

Why Kappa Data?

Our value lies in more than just distributing top-tier cybersecurity products. We offer:

- **Tailor-Made Solutions:** We collaborate with IT partners to create customized security strategies for their end-customers, filling in all the gaps along the cybersecurity journey.
- **Training & Support:** From technical certifications, to strategic guidance, we equip partners with the expertise needed to thrive and deliver the best experience towards their end-customers
- **Comprehensive Portfolio:** We cover every aspect of cybersecurity, ensuring that no critical area is overlooked.

Does this sound like music to your ears?

Come talk to us!

Everyone has their cybersecurity journey, and we would like to join it! Our ultimate goal is to build a safer and more secure world, and ensure that your end customers have a robust and secure network to work in the best way possible.

Together with our partners, we can build safer and more resilient networks!
